

### Session 3 – Interactive session I: Identification of Impacts

In this interactive case study, participants will work in smaller working groups with the aim to identify the likely impacts associated with the Option 1 and 2 presented in the Case Study for Sessions 3&5. The Case Study is based on Draft Impact Assessment of the “Regulation for the Design of a Functioning Integrated Administration and Control System (IACS) [for farmers support schemes] and a Land Parcel Identification System (LPIS) in Turkey”.

#### Tasks:

1. Read the whole Case Study Worksheet individually to familiarize yourself with the issue and prepare for the group assignment. (10 mins)
2. Work on below exercise in your group. (50 mins)
3. Present your results to the other groups and participate in discussions (all groups). (5 mins)

#### Exercise:

Based on the case study material participants are asked to discuss and prepare the following questions and issues:

1. What are the likely impacts (economic, social, environmental)?
2. Who is affected?
3. Are the impacts positive or negative?
4. How significant are the impacts?
5. Over what time period do the impacts occur?
6. Is there any distributional effect among impacts?
7. Identify impact on specific sectors/categories of stakeholders. i.e. competition, SMEs

Use the table below to present impacts

Impacts	Who is affected	Cost/Benefit (+/-)	Significance (1- lowest, 5 – highest)	Time period (one time/ annual / how many years)	Distributional (Yes/No)
<b>Option 1</b>					
<b>Economic</b>					
<b>Social</b>					
<b>Environmental</b>					

<b>Option 2</b>					
<b>Economic</b>					
<b>Social</b>					
<b>Environmental</b>					

Other impacts:

- Competition
- SMEs
- Poor people
- Other specific impacts
